

# APT Web Dialogue

## Public Consultation

11 June 2025

Peng Zhao  
VP Policy & Regulation, GSOA

# Global Association Representing the Entire Satellite Industry

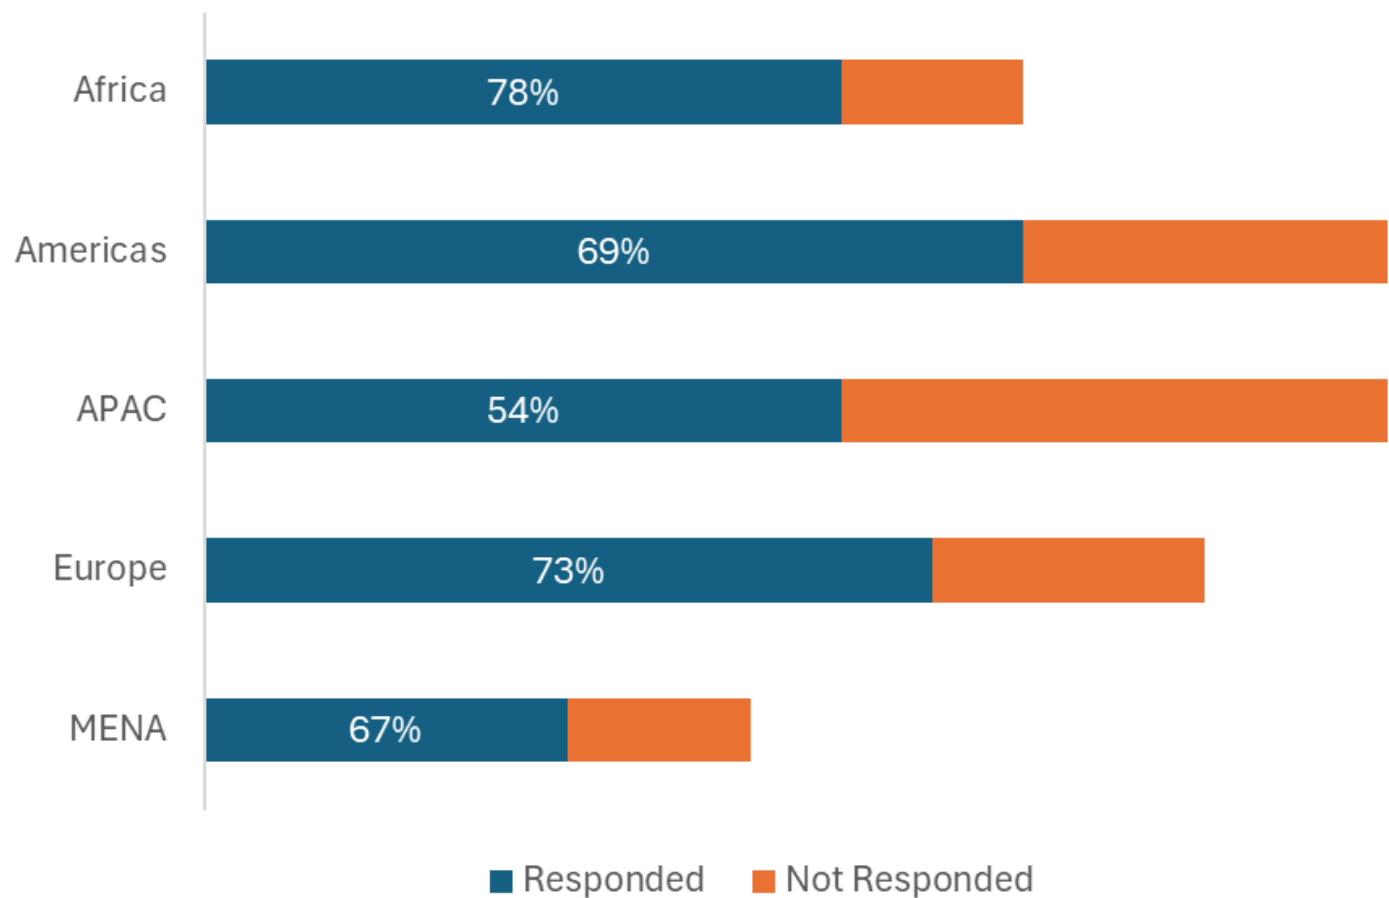

GSOA provides a platform for collaboration between member companies involved in the satellite ecosystem globally and a unified voice for the sector

## As global industry association, we can provide:

- Aggregated, expert views, with balanced stakeholder representation
- Policy cohesion and global harmonization
- Early warning on unintended consequences:
  - ✓ Our global exposure can help bring best practices and comparative insights
  - ✓ We can flag local regulation that might conflict with existing global practices or create interoperability issues

Consultations responded by GSOA worldwide in the last 12 months

## Before consultation

- Lack of context / thought process
- Lack of outreach to stakeholder – not always aware of important consultations

## During Consultation

- Lack of specific questions or options to choose from
- Lack of time – as association, require time to build consensus among stakeholders. Timing need to be minimum 6-8 weeks.

## After Consultation

- Lack of feedback or justification on selected options

# Thank You!
